

Over the next

5

years,

corn farmers will
grow even more
corn on the same
amount of land
thanks to effective use
of technology and
environmental practices.

This means plenty of corn in Indiana to feed

**PEOPLE &
ANIMALS,
and to
produce FUEL.**

YEAR OF DAIRY COWS BONUS!

Soybeans are a source of protein and an important part of a dairy cow's daily diet.

One dairy cow

fed a diet including soybean meal

produces about

128

=

glasses of milk a day.

Farmers are the original environmentalists;
taking care of their land is TOP priority.

Over the last

20 years,
soybean farmers
have reduced their

LAND USE,

energy use, greenhouse gas
emissions and soil loss
while continuing to grow
more nutritious food.

LAND USE

26%

DOWN

ENERGY USE

65%

DOWN

GREENHOUSE
GAS EMISSIONS

38%
